## **GOLD FLEX LIFE SCIENCES PARTNERS WITH SANI MEDICAL GROUP**

**GALVESTON, TX** - Gold Flex Life Sciences, Inc, has announced a partnership with Sani Medical Group that enables the company to administer pain relief treatments at their facility in Playa del Carmen, Mexico.

The patented Gold Flex treatment is proven to be a safe and targeted treatment of localized joint pain, that allows doctors to intervene while stopping or eliminating pain. The treatment is shown to restore mobility and improve the patient's quality of life. The majority of Gold Flex patients suffer from painful arthritic joints and are treated on the affected joint. There have been no side effects reported at this time. Patients who have received the treatment experience noticeable relief following a simple office procedure where a one-time low dose of pure elemental gold is implanted by a physician directly into the joint. Interviews tracking patient condition 2 years following treatment show that the pain had not returned to date.

Former professional soccer player, Willie Luthy, a resident of Galveston, Texas, who received the Gold Flex Treatment stated. "Two years ago, Gold Flex changed my life. Years of wear and tear had me in daily pain. I struggled walking through the grocery store. Simple tasks became torture. Now I take long walks, and hike, with my wife. The simple 15- minute procedure made a difference in my life. I remain pain free."

Currently, the Gold Flex Treatment is pending US approval, which can sometimes be a lengthy procedure. The treatment has been administered in Denmark by the Gold Flex team at Aalborg Hospital for several years. The Mexico location was added for convenience to patients who prefer reduced travel time and the ambience of the Mexican Riviera. Direct flights to Cancun International Airport from major cities in the United States is a major draw for patients who register for the treatment.

Mexico has a strong history of partnering with US medical teams, including stem cell treatments, which is administered at the International Stem Cell Center located in Cancun. Gold Flex began treating patients in Playa del Carmen in January, 2021.

Dr. Chris Frederickson serves as the Chief Executive Officer at Gold Flex Life Sciences, Inc. based in Galveston, Texas. Frederickson is the leading authority on zinc in the world and is honored with the Frederickson Prize at the International Society for Zinc in Biology. Alumnus of Harvard College and the University of Chicago, Dr. Frederickson has led successful ventures with MD Anderson Cancer Center, Johns Hopkins, and MIT.

Gold Flex is currently enrolling patients from the United States. For more information go to [www.goldflexls.com](http://www.goldflexls.com) or call (409) 539-5355.
